SUPERINTENDENT'S PRESS RELEASE

Henry V. Wagner Jr., Ed.D., Superintendent

DATE: December 21, 2016

Engineers at Work

Submitted by – Terrell Sample-21st CCLC Coordinator

Sandy Hill S.T.E.A.M. students enjoyed a fun-filled afternoon engaging in **Next Gen Science Standards** as their teams constructed and designing **parachutes** for **experimental egg drops** from the rooftops of Sandy Hill Elementary School. Some teams **cheered** and some even **prayed** before their launch.

Sandy Hill Steamer and future engineer, **Makenzie Morrissett**, successfully won the challenge as she designed & engineered a successful parachute egg drop **without cracking**, utilizing her innovative scientific skillsets developed in S.T.E.A.M. This was one of many great examples of these STEAM students using their **creativity and problem solving** skillsets through teams to formulate solutions to various problems. We look forward to their growth and preparation as they become future **scientists and engineers**.
